Mykhailo Matviichuk

SENIOR FULL-STACK ENGINEER

michalmatviychuk@gmail.com | linkedin.com/in/mykhailo-matviichuk-066831157 | Open to relocate

PROFESSIONAL SUMMARY

Senior full-stack software engineer with 8 years of experience building TypeScript and Node.js services and React applications for clients across the US, Europe, and Israel. Strong backend experience in API design, AWS services, data modeling, third-party integrations, and automated testing, with hands-on delivery across healthcare, environmental data, field inspection, media, and consumer products. Experienced collaborating directly with clients, reviewing code, estimating work, and supporting production systems.

CORE COMPETENCIES

TypeScript & Node.js | Backend APIs & Integrations | AWS & Serverless | React & Full-Stack Delivery | Data Modeling & Performance | Automated Testing | Production Support | AI-assisted development

WORK EXPERIENCE

Inoxoft

October 2021 – March 2026

Senior Full-Stack Developer

- Delivered web platforms for clients in environmental data, healthcare, field inspection, and consumer applications; collaborated with teams of 3–8 developers and worked directly with clients on requirements and production issues.
- Built and maintained a declaration portal and public REST API with 20+ endpoints; supported digitization of 200+ Environmental Product Declarations and integration with the openEPD API.
- Moved PDF generation for six templates from client-side rendering to an AWS Lambda and Puppeteer service, reducing render time from up to 15 seconds to 2–3 seconds.
- Built healthcare EHR interfaces and integrations with four systems, and designed data flows that excluded protected health information from downstream processing.
- Improved inspection-platform queries from 10s to 2s through MongoDB indexes and aggregation rewrites; participated in code review, estimation, testing, and PagerDuty on-call.

Freelance

Software Developer

- Owned the NestJS backend for a traveler emergency-assistance service that accepted 1,000+ emergency reports in Ukraine via internet and SMS.
- Integrated SMS-based OTP and inbound emergency messages, modeled users and emergencies in PostgreSQL, and streamed live updates to a React admin panel using Server-Sent Events.
- Built a hockey scouting platform backend end to end, including PostgreSQL data models, player scoring, authentication, API-token authorization, CI/CD, and scheduled third-party data synchronization.

GlobalLogic

October 2019 – September 2021

Full-Stack Developer

- Built backend services for identity, subscriptions, and purchases for a US multimedia client, integrating five payment providers through REST and SOAP APIs.
- Implemented authorization across three subscription levels, added Jest unit tests, and monitored production services with New Relic.
- Published catalog updates asynchronously through SNS and SQS instead of polling; developed scheduled release windows by time and subscription tier, including holiday releases.

Edvantis Software Inc

February 2018 – September 2019

Full-Stack Developer

- Built internal tools and production data systems for European and US clients, including dashboard visualizations, MSSQL aggregation scripts, and SSRS reports.

PROJECTS

Mova-Lab: Speech-Therapy Practice Platform

Web app for Ukrainian speech-therapy workflows, including student onboarding and homework, teacher scheduling and student management, and interactive practice exercises. Built as a Yarn workspaces monorepo with HttpOnly cookie-backed JWT authentication and appointment booking.

React, TypeScript, Vite, NestJS, MongoDB, Strapi, Docker, Tailwind CSS

EDUCATION

Master's in Computer Science Lviv Polytechnic National University — September 2018 – December 2019
Ukraine

Bachelor's in Software Engineering Lviv Polytechnic National University — September 2014 – June 2018
Ukraine

CERTIFICATIONS

AI Fluency: Framework and foundations	Claude Academy	October 2026
Building with the Claude API	Claude Academy	September 2026
Product Judgment: making confident decisions without complete data	Mind the Product × Pendo	September 2026
How to Build Impactful AI Agents Without Losing Your Head	Mind the Product × Pendo	September 2026
Product Engineer with AI	Hyperskill, InMind Lab	September 2026
HIPAA awareness training		February 2024

SKILLS

Languages: TypeScript, JavaScript

Backend & APIs: Node.js, NestJS, Express, REST, SOAP, Webhooks, Server-Sent Events, Microservices, JWT, OAuth, TypeORM

Frontend: React, Vite, Tailwind CSS

Cloud & DevOps: AWS (Lambda, EC2, S3, SQS, SNS, CDK, CloudWatch), Docker, CI/CD, DigitalOcean, Firebase, New Relic, PagerDuty

Databases: PostgreSQL, MongoDB, Microsoft SQL Server (MSSQL)

Testing: Jest (unit and integration), Playwright (end-to-end)

Practices: Agile, Scrum, Kanban; English (professional working proficiency, B2)
